## Area-Imaging Vertical Slot Scanner

For retailers looking to elevate checkout throughput, improve the customer experience and better execute mobile marketing programs, the Honeywell Solaris™ 7980GEL vertical slot scanner is up to the task. With its compact, modern design and powerful imaging capabilities, the Solaris 7980GEL scanner fits easily into existing enclosures used in high-volume retail checkout environments such as convenience, drug, specialty, liquor and grocery stores.

Incorporating Honeywell Adaptus™ 6.0 area-imaging technology, the Solaris 7980GEL scanner delivers exceptional scanning performance on 1D and 2D barcodes and can even read smartphone screens, digital wallets and printed identification cards. Omnidirectional scanning capability – along with an extended depth of field and advanced decoding software – allows cashiers to scan virtually all barcodes on the first pass, with minimal concern for orientation or barcode print quality.

Installing the Solaris 7980GEL scanner into existing checkout systems is easy. Multiple on-board interfaces make the Solaris 7980GEL scanner compatible with most POS systems, and automatic interface detection speeds up installation. The Solaris 7980GEL scanner further simplifies integration by drawing power directly through USB, eliminating the need for an additional power supply and cabling.

The Solaris 7980GEL area-imaging scanner can read smartphone coupons, digital wallets and identification cards with ease.
